

**ERRATA SHEET FOR
ANSI/ASHRAE STANDARD 52.2-2012
Method of Testing General Ventilation Air-Cleaning Devices
for Removal Efficiency by Particle Size**

June 29, 2015

The corrections listed in this errata sheet apply to all copies of ANSI/ASHRAE Standard 52.2-2012. The first printing is identified on the outside back cover as “Product code: 86145 1/13” and the second printing as “Product code: 86145 6/13 *Errata noted in the list dated 5/23/13 have been corrected.*” The shaded items have been added since the previously published errata sheet dated November 12, 2014 was distributed. Items identified with an asterisk “*” apply only to the first printing, they have already been incorporated into the second printing.

10.7.1 Test Procedure

10.7.1.1 The test airflow rate shall be selected in accordance with Section 8.1. The final resistance shall be chosen using the ~~Table 12-1~~ values as minimum, except that the final resistance shall be equal to or greater than twice the initial resistance.
